 - International Society for Philosophical Enquiry (99.9%)
 - HRIQ (99.9%)
 - ISI-Society (99.93%)
 - WGD (Listed as having IQ 176 (sd 15) on Numeralis Intelligenia)
- My Journey in IQ Land:
 - In June 2003, the channel FOX aired a program called "Test the Nation," which started my interest in IQ societies.
 - In December 2004, aged 17, I took my first high range test (Mysterium Entrance Exam 4) for Mysterium Society.
 - In 2005, I discovered many high range test designers mostly thanks to Darryl Miyaguchi's website, which was used as a directory of high range tests. Throughout the years, I would take more high range tests and join more societies.
 - In mid-2010, I thought about creating high range tests; in April 2013, I thought about creating IQ societies.
 - In October 2013, I came up with various concepts for high range tests, with the first being AdSub
 - In fall 2014, I thought about potentially creating a high psychic society based on untimed psi tests.
 - In March 2016, I decided to create the AdSub test, then six other numerical tests.
 - In April 2016, I created several psychic and personality tests.
 - In January 2017, Opal Quest Group was launched with the first Winter Words Contest (Reduction Riddles).
- Brief History of the Name **Opal Quest Group**:
 - Inspired by Sonic 2's chaos emeralds, initial name "Emerald Group" (August 2016). In mid-Sept 2016, I discovered the name was taken; by looking up gems, I discovered opal, which led to Opal Gems Group → Opal Quest Group.
